

# THE [beck] FASTENER GROUP

pros speed through projects and increase profits, while improving the quality of the final work product and their lives.

The new RoofLoc SCRAIL fastening system was invented for high-speed metal roof installation, combining collated RoofLoc SCRAIL fasteners with their newest Italian-designed pneumatic nailer to deliver over 400 pounds of holding power. Torque-free driving protects the metal roof surface and eliminates “pigtailed,” while the leak-proof EDM washer enhances quality. Installing metal roof fasteners at a speed that’s two times faster than collated screws and eight times faster than bulk screws, provides the real benefit — finishing faster, for increased profits and increased time to spend as you wish.

SubLoc PRO SCRAIL fasteners share the same time-saving benefits, providing superior clamping force via a double thread design that prevents squeaks in sub-floor construction. This IAPMO code-approved fastener also has a patent-pending Diamond Coating, further ramping up its holding power.

## DELIVERING TIME — TO SPEND ON YOUR OWN TERMS

To remain competitive over the past decade, manufacturers in the pneumatic tool and fastener industries have had to do some serious soul-searching to define how they can bring the best value to those who use their products.

The progressive-minded BECK Fastener Group has whole-heartedly embraced this challenge, because challenging the status quo is part of the culture of this family-owned business, having withstood multiple economic downturns for over 100 years.

This is a tech-savvy business with a clearly defined sense of who they are and what they offer their valued customers. It’s more than just a tenacious curiosity and enthusiasm for continually figuring out solutions to age-old problems. Their focus is delivering new pneumatic tools and fastening systems that help get a superior quality job done faster, gaining their customers extra time to move on to the next job, or simply use as leisure time.

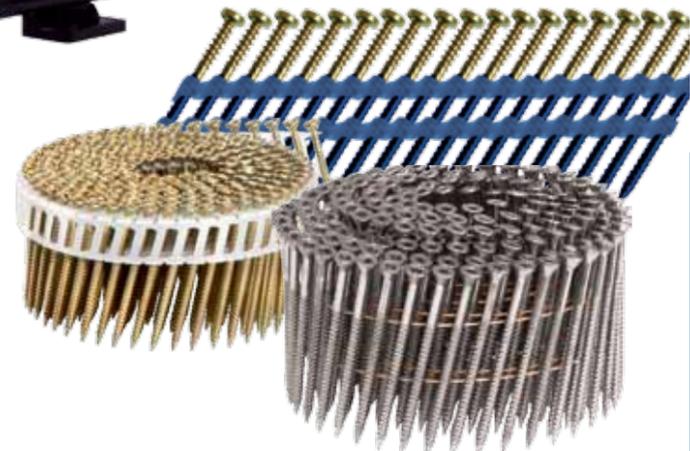

Brett McCutcheon, general manager of BECK’s fully-owned, exclusive U.S. master distributor, FASCO America, comments, “This

is a company who has developed staples approved to the exacting standards required of European satellites, with a passion for creating products that enhance the quality of life for all their customers.”

McCutcheon points to the SCRAIL family of products, originally launched in 1998. Through relentless innovation, BECK has grown SCRAIL into a broad array of fasteners focused on helping

*The BECK Fastener Group’s FASCO tools lineup features Italian-designed, hand-crafted pneumatic tools and German-designed, Austrian-made fasteners for superior speed, comfort and safety.*
