

HITACHI

» The Hitachi NH90AB 3 1/2-inch palm nailer accepts common bulk nails up to 3 1/2 inches long ranging from .113 - .162 inches in diameter. The magnetic nose secures a fastener in place so that the user can easily guide the nail tip into the material or various types of pre-punched metal connectors safely and accurately. It weighs 1.3 pounds and comes with Hitachi's five-year warranty.

SOUTHWIRE

» Southwire's new MAX PUNCH XD Knockout Tool is used with an 18-volt cordless drill to deliver quick, accurate knockouts. A benefit of this design is the tool's ability to deliver consistent results without the typical mess of a hydraulic platform. Its precision gear train delivers fast knockouts up to 4 inches in 10-gauge stainless steel, all while using Southwire's three-point dies for clean, smooth cuts. It features a two-piece draw stud and replaceable chuck adapter, virtually eliminating the need to send the tool in for repair.

MAKITA

» Makita's new model XSR01Z 18V X2 LXT brushless cordless rear handle circular saw is the world's first cordless rear-handle 7 1/4-inch circular saw powered by two 18-volt Lithium-ion batteries. In early testing, the XSR01Z produced up to 558 cross cuts of 2x4 SPF and up to 291 cross cuts of 2x10 SPF with two fully-charged 18V LXT 5.0-Ah batteries. Its 2 9/16-inch max cutting depth cuts 3x lumber in a single pass.

STANLEY FATMAX

» The Stanley FATMAX fiberglass round point shovel features the patented Control-Grip technology for comfort in any position, AntiVibe vibration and shock reduction and the Xtreme Step shoulder. While its exterior is designed to reduce injury and promote comfort, the interior is reinforced by steel down to the core — crafting a heavy-duty professional grade shovel. The fiberglass round point shovel takes outdoor work to a whole new level, guaranteed for a lifetime.

FAST CLEAN RELIABLE

Traditional Concrete Drill Bit

Speed Clean™ DXS
Dust Extraction System

Code-listed:

SET-XP® ICC-ES ESR-2508
AT-XP® IAPMO UES ER-263

Drill and clean holes in concrete with 50% labor savings, reduce jobsite dust and replace the traditional blow-brush-blow method with the new Speed Clean™ DXS dust extraction system. Developed in conjunction with alliance partner Robert Bosch Power Tool Corp., this comprehensive drill bit-and-vacuum system produces precise, clean holes in concrete and is code listed with Simpson Strong-Tie® SET-XP® and AT-XP® anchoring adhesives.

Make the switch today. Learn more by visiting our website strongtie.com/speedclean or call (800) 999-5099.
